

## A.I OLYMPIAD Process for Senior Classes 11&12

- TASK:** (a) On any topic, to create a template using AIDO Platform and to
- (b) Generate result based on the above made template
- (c) Save the result/output under documents for evaluation by EHF.

**Sample topic:** How to generate original academic content customized to the criteria of your choice .

### Step by step process :

1. Go to the AI.DO website [www.debulabs.com](http://www.debulabs.com) or scan the QR code given

2. Log in using given ID and password (PW) with the help of your teacher. Here ID is [senior@ehf.com](mailto:senior@ehf.com) and PW is 12345678 .

3. In the dashboard click on the AI Writer, which is showing in your left side menu.

The screenshot displays the AI.DO dashboard interface. On the left, a sidebar menu lists various tools: Dashboard, AI Bots, Documents, AI Editor, AI Writer (highlighted with a red arrow), AI Video, AI Detector, AI Plagiarism, AI Image, AI Video To Video, Chat Settings, AI Article Wizard, AI Photo Studio, AI File Chat, and AI Realtime Image. The main dashboard area shows a welcome message for 'sandy' and a search bar for documents, templates, and tools. A 'Try It Now' button is visible in the welcome section.

4. Click on create template given at top right of the webpage.

5. Fill the details:

- a. Enter title of the template: Academic Content.
- b. Enter the Description: Generate original academic content customized to the criteria of your choice.
- c. Ignore template icon and color.

## Add Template

**1 Template**

Template Title ⓘ

Template Description ⓘ

Template Icon ⓘ

Template Color ⓘ

● #8fd2d0 Clear

- d. Select input type which can be either (i) **Input field**: if you want to put 1 line or (ii) **Test area field**: if there are more than 1 lines or (iii) **Select list field**: in case you want to put a drop down button. Here we have taken (iii) select list field with input name as 'Select class' so that we have all the classes 1-12 in a drop down menu. In this case no input

description box will show. Under Select list input key in Class 1, Class 2, Class 3..... till class 12 and keep saving after each class input using + add new. Now repeat this process to include content type, text length and topic by clicking on (+) given at the right of input groups. For eg. Select (a) for topic; put 'Topic' in input name; 'Enter the topic' in input description. (There will be no select list input column or + add new here). Do the same for content type and text length.

The screenshot shows a configuration panel titled "2 Input Groups" with a "+" button on the right. Inside the panel, there are four sections:

- Select Input Type:** A dropdown menu currently showing "Selectlist Field".
- Input Name:** A text input field with the placeholder text "Enter Name Here".
- Input Description:** A text input field with the placeholder text "Enter Description Here".
- Select List Inputs:** An empty list box with up and down arrows. Below it, a note reads: "Hold cmd(on mac) or ctrl(on pc) to select multiple items."

At the bottom of the panel is a purple button labeled "+ Add New".

- e. Under prompt what you input in the input name (eg. Select class) will automatically come as **\*\*class\*\***. In created input. This is the variable and do not change this.
- f. Now write the custom prompt. This matters the most to get the best result/output. For eg. Create original lesson with MCQ's for 12<sup>th</sup> class students preparing for NEET on the topic gravitation. The lesson should be given pointwise and the MCQ's must have detailed answer. Also give references from where the MCQ's have been taken.
